May National Associates Inc. Expands Support of Bondaflex Brand to Continue Growth in the Commercial Market

-High-quality, innovative product line backed by broadened sales, distribution and technical team-

Lakewood, N.J. (September 23, 2008) – May National Associates Inc., an industry leader in the manufacture of acrylic, polyurethane, hybrid and silicone sealants and adhesives, has expanded its support of the Bondaflex brand to continue to grow and serve the commercial market. The company has also broadened its nationwide network of sales, distribution and technical support to assist users with selecting and using the right product for their application.

Bondaflex, established in 2004, was created for under-supported market niches, and continues to service the commercial construction, fenestration, industrial and transportation markets. By coupling innovation and customization with an existing product line, the brand offers a full product range for an array of applications. Bondaflex sealants and adhesives are each formulated with strict quality control to provide high-level performance and consistency across a multitude of industries.

With a wide variety of product properties to choose from (such as non-sagging, self-leveling, sprayable, fast-cure, etc., available in clear and a wide range of popular, custom colors) Bondaflex products enable end-users to choose the best product for each application. Applications range from commercial construction, in-plant assembly and structural glazing to bridge joints, highways, parking garages and more.

May National Associates Inc. Expands Bondaflex Support/ Page 2 of 2

Bondaflex offers a broad range of high-quality products that can meet specific needs; offer better performance with regards to cure time, strength or elasticity; as well as other innovations, including Ucolor, a system that enables sealants to be colored in the field, which eliminates the lead time and waste associated with custom color orders. The products are available through a nationwide distribution network supported by the Bondaflex sales and technical team and manufacturers' reps.

To lead Bondaflex's growth in the commercial market, May National has promoted Joe Butler to national sales manager, responsible for the strategic development of the Bondaflex brand as well as overseeing regional managers and manufacturers' reps. Supporting the Bondaflex brand on the technical will be Jeff Knepper, director of research & development and technical services, selected to develop new products, create custom formulations and continue to ensure the quality of the entire product line; and Ken Sutherland, technical services application manager, who will provide application support by managing customer inquiries regarding product use and design.

Bondaflex Technologies, the leading brand of May National Associates Inc., offers high-quality acrylic, polyurethane, hybrid and silicone sealants and adhesives to the commercial construction, fenestration, industrial and transportation markets. Each Bondaflex product is formulated with strict quality control to provide high-level performance and consistency across a multitude of applications and industries. Visit www.bondaflex.com for more information.
