

## Your ready-to-use sealant and adhesive – Bondaflex® Silfast™ 501

Silfast 501 offers superior window fabrication, faster production of curtainwall and skylights, and better performance and ease of use for impact glazing systems in the shop or field.

### FEATURES

- Unaffected by most atmospheric conditions
- Excellent unprimed adhesion to polyester films and most aluminum finishes
- Unmatched high early green strength
- Fast-curing neutral cure
- Compatible with insulated glass sealants and laminated glass
- One-component
- Superior properties to conventional two-parts, ± 25% joint movement

### BENEFITS

- Extremely long service life
- Superior window fabrication and performance
- Faster production of curtainwall and window systems without the problems of two-part pumps
- Faster production capability
- Faster shipping of finished unit
- Excellent flexibility to withstand dynamic stresses in high performance impact security glazing systems
- Bonds to most substrates without priming
- Ready to use, labor cost reduction
- High durability while providing flexibility
- Better performance and ease of use for replacement work in the field for impact and structural glazing systems

### Certifications

Meets the requirements of ASTM C-920, Type S, Grade NS, Class 25, Use NT, T, M, G, A, O; TT-S-00230C, Type II, Class A; TT-S-001543A, Class A; CAN/CGSB-19.13-M87, AAMA 802.3 Type I and II, AAMA 803.3 Type I, AAMA 805.2, AAMA 808.3 and California Air Resources Board 2003 requirements for Volatile Organic Compound content.

Bondaflex Silfast 501 is formulated for window fabrication and has passed the Florida Hurricane Glazing Code when used in designed systems.

### Packaging

- 10.1 fl. oz. (300 ml) disposable cartridges
- 4.5 gal (17 L) in a 5 gal pail
- 52 gal (197 L) in a 55 gal drum

Special packaging available upon request; ask your local representative for more information.
